

## SMARTPHONE EVCO EMAIL SETUP

Below are the email settings to setup EvCo mail accounts on your smartphone. You can try it yourself or give the info to the tech support people at your smartphone carrier for them to set it up for you.

### INCOMING MAIL - POP3

Username: The left part of your email address. Example - [yourname@evcohs.com](#) (generally in lower case)

Password - the password associated with your email address - case sensitive - (call if you can't remember)

POP3 Server Name - [evcohs.com](#)

Security Type - [SSL](#)

Port - [995](#)

Delete from Mail Server - [7 days](#)

### OUTGOING MAIL - SMTP

SMTP Server Name - [evcohs.com](#)

Security Type - [SSL](#) or [TLS](#)

Require Sign In or Authentication - [Password](#) or check the box

Username - the left part of your email address. example - [yourname@evcohs.com](#) (generally in lower case)

Password - the password associated with your email address - case sensitive - (call if you can't remember)

SMTP Port - [465](#) for [SSL](#) or [587](#) for [TLS](#)

In general, it's best to use SSL (Secure Socket Layer) for Incoming Mail (POP) and TLS (Transport Layer Security) security features for Outgoing Mail (SMTP).

For specific questions please call your cell phone carrier tech support.
